FAQ: Providers

What does the QC3 offer me?

The QC3 offers many ways of helping Providers, including a Registry, or list, that you can join. This Registry will be used by Consumers in finding a Provider.

There may be training on a variety of topics including CPR/First Aid, dementia, and stress management.

What is the Registry?

The Registry is a list of Providers that have been screened by the QC3. The screening will help Consumers find the right Provider for them. Providers may also choose to be on a list of back-up Providers should a Consumer's usual Provider be unable to help. It is the Provider's choice to be on the Registry.

It may include information such as your name and contact information, and where you would like to work. Other items may be what languages you speak and smoking preferences. All of these items will help the Consumer find the Provider that is right for them.

The Provider will be able to change their listing by calling the QC3.

How do I get on the Registry?

To find out how to get on the registry, click on the Registry 101 link.

What training does the QC3 offer?

Trainings offered by the QC3.

The Michigan Quality Community Care Council is supported by the Michigan Department of Community Health.
