12. What kinds of school choice does your organization support? Please pick the description that best describes your organization's position.

| | | Response Percent | Response Total |
|---|--|---------------------|-------------------|
| Public School Choice Only | | 8.4% | 14 |
| Private School Choice Only | | 5.4% | 9 |
| Both Public and Private School | | 83.2% | 139 |

| Choice | | | |
|-------------------------|--|----|-----|
| Neither | | 3% | 5 |
| Total Respondents | | | 167 |
| (skipped this question) | | | 83 |

13. The following is one way that the argument for school choice is often framed:

Equity--School choice is a matter of educational equity, ensuring that children of all incomes and races have access to quality education. Too many public schools in low-income and minority neighborhoods fail to educate the children in their care. *School choice will help close the educational achievement gap between rich and poor because all parents will be able to choose good schools for their children.*

How frequently does your organization frame the school choice issue in this way?

| | Never | Sometimes | Often | Always | Response Total |
|-------------------------|--------|-----------|----------|----------|----------------|
| Use Equity Frame: | 5% (8) | 16% (26) | 36% (60) | 43% (72) | 166 |
| Total Respondents | | | | | 166 |
| (skipped this question) | | | | | 84 |

14. The following is one way that the argument for school choice is often framed:

Financial--School choice is a matter of financial responsibility and taxpayer relief. Skyrocketing taxes go to support failing public schools, and more tax dollars are spent on education every year with no improvement in return. *School choice will help keep our taxes low because private and other*

schools of choice cost less and parents spend education dollars more wisely than bureaucrats.

How frequently does your organization frame the school choice issue in this way?

| | Never | Sometimes | Often | Always | Response Total |
|-------------------------|----------|-----------------|----------|----------|----------------|
| Use Financial Frame: | 19% (31) | 34% (57) | 27% (45) | 20% (33) | 166 |
| Total Respondents | | | | | 166 |
| (skipped this question) | | | | | 84 |

15. The following is one way that the argument for school choice is often framed:

Moral Values--School choice is a matter of teaching moral values in a safe environment. Public schools fail to educate children in moral principles or character, causing a decline in discipline, responsibility, and safety in our classrooms. School choice will help make sure schools are safe and teach good values because parents know best what values their children should learn in school, and private schools can choose a mission with confidence in parental support.

How frequently does your organization frame the school choice issue in this way?

| | Never | Sometimes | Often | Always | Response Total |
|-------------------------|----------|-----------------|----------|----------|----------------|
| Use Moral Values Frame: | 29% (48) | 40% (66) | 15% (25) | 16% (27) | 166 |
| Total Respondents | | | | | 166 |

| | |
|-------------------------|----|
| (skipped this question) | 84 |
|-------------------------|----|

16. The following is one way that the argument for school choice is often framed:

Competition--School choice is a matter of educational improvement through competition. Public schools have a captive audience, and don't need to change to meet anyone's needs or improve their performance. *School choice will help improve public schools because parents would be able to send their child to the best school around and public schools would have to compete for students.*

How frequently does your organization frame the school choice issue in this way?

| | Never | Sometimes | Often | Always | Response Total |
|-------------------------|--------|-----------|----------|----------|----------------|
| Use Competition Frame: | 4% (6) | 17% (28) | 34% (57) | 45% (75) | 166 |
| Total Respondents | | | | | 166 |
| (skipped this question) | | | | | 84 |

| Neither | | 14.3% | 1 |
| Total Respondents | | | 7 |
| (skipped this question) | | | 243 |

34. The following is one way that the argument for school choice is often framed:

Equity--School choice is a matter of educational equity, ensuring that children of all incomes and races have access to quality education. Too many public schools in low-income and minority neighborhoods fail to educate the children in their care. *School choice will help close the educational achievement gap between rich and poor because all parents will be able to choose good schools for their children.*

How important is this way of thinking about school choice to your organization's support of the policy?

| | Not Important | Somewhat Important | Important | Extremely Important | Response Total |
|--|---------------|--------------------|-----------|---------------------|----------------|
|--|---------------|--------------------|-----------|---------------------|----------------|

| | | | | | |
|-------------------------|---------|---------|---------|---------|-----|
| Equity: | 14% (1) | 57% (4) | 14% (1) | 14% (1) | 7 |
| Total Respondents | | | | | 7 |
| (skipped this question) | | | | | 243 |

35. The following is one way that the argument for school choice is often framed:

Financial--School choice is a matter of financial responsibility and taxpayer relief. Skyrocketing taxes go to support failing public schools, and more tax dollars are spent on education every year with no improvement in return. *School choice will help keep our taxes low because private schools cost less and parents spend education tax dollars more wisely than bureaucrats.*

How important is this way of thinking about school choice to your organization's support of the policy?

| | Not Important | Somewhat Important | Important | Extremely Important | Response Total |
|-------------------------|---------------|--------------------|-----------|---------------------|----------------|
| Financial: | 0% (0) | 14% (1) | 43% (3) | 43% (3) | 7 |
| Total Respondents | | | | | 7 |
| (skipped this question) | | | | | 243 |

36. The following is one way that the argument for school choice is often framed:

Moral Values--School choice is a matter of teaching moral values in a safe environment. Public schools fail to educate children in moral principles or character, causing a decline in discipline, responsibility, and safety in our classrooms. *School choice will help make sure schools are safe and teach good values because parents know best what values their children should learn in school, and private schools can choose a mission with confidence in parental support.*

How important is this way of thinking about school choice to your organization's support of the policy?

| | Not Important | Somewhat Important | Important | Extremely Important | Response Total |
|-------------------------|---------------|--------------------|-----------|---------------------|----------------|
| Moral Values: | 0% (0) | 43% (3) | 29% (2) | 29% (2) | 7 |
| Total Respondents | | | | | 7 |
| (skipped this question) | | | | | 243 |

37. The following is one way that the argument for school choice is often framed:

Competition--School choice is a matter of educational improvement through competition. Public schools have a captive audience, and don't need to change to meet anyone's needs or improve their performance. *School choice will help improve public schools because parents would be able to send their child to the best school around and public schools would have to compete for students.*

How important is this way of thinking about school choice to your organization's support of the policy?

| | Not Important | Somewhat Important | Important | Extremely Important | Response Total |
|-------------------------|---------------|--------------------|-----------|---------------------|----------------|
