Subject: MQC3 talk with John

Nancy/Chuck - Matt Sweeney stopped by asking me to join him in a conversation with John about the MQC3.

Context of our conversation:

John continues to receive messages from Kahn indicating his strong desire to fund this program. I walked John through the background of the program (provided him with our analysis/one pager that we've distributed in the past) and brought him up to speed on current conversations.

John indicated that Kahn proposed that MQC3 would be willing to contribute 5 cents of their 50 cent per hour wage increase appropriated in FY10 to fund the \$500,000 necessary to restore the FY12 eliminated funds. Based on what was appropriated in FY10, a five cent decrease would be approximately \$643,000 general fund.

John instructed Matt to call the Senator Kahn and tell him that the administration would be accepting of the offer but that Kahn would need to communicate this information to the House.

If this occurs, I would imagine that we would need to include this as part of our FY12 supplemental list. As far as I'm aware, the department is not up to speed on the latest discussions.
